- 1200-115200 Baud Rate
- Din-Rail Mounting Ready

Introduction

The IA-2100 is Series-3000, RS-232 Optic-Isolator. This adaptor may be added to any RS-232 controlled system for better handling Ground Loops and better protection the Host PC from Factory Floor EMI/RFI noise interference.

The IA-2100 can be easily connected between the Host PC to the Series-3000 I/O controller while using standard DB9 Male/Female Cables.

No additional-Power Supply is needed. The-IA-2100 Isolator unit is powered by the Series-3000 I/O Controller.

Specifications
